

Add a size chart

Add a size chart for a category, such as clothing or shoes, so customers can open it from the product page and pick the right size.

Add-on [Online store](#)

A size chart lists your sizes with their measurements, so customers can choose with confidence. It's attached to a category, and it shows on the product page of every item in that category.

Online stores are an add-on. If your site doesn't have one yet, ask us about adding it; we quote it in writing first.

Before you start

- Create your categories first. See [Organize products into categories](#).
- Each category holds one size chart at a time. Attaching a new chart replaces the current one. If no other category uses the replaced chart, it moves to drafts and is hidden from your store.
- One chart can serve several categories.

Create a size chart

1. Log in to your site editor.
2. In the side panel, click **Store**, then **Manage Store**.
3. In the side menu, open **Settings**, then click **General**.
4. Click the **Cart & Checkout** tab and scroll to **Size charts**.
5. Click **Add Size Chart**, or **Manage Size Charts** if you already have some. Then click **+Create Size Chart**.
6. Pick the starting layout closest to what you sell, such as **Footwear**.
7. Edit the table so it shows your sizes and measurements, then click **Next Step**. The starting layout also has a few tips on how to measure, and you can add your own advice.
8. Choose the category the chart belongs to, then click **Apply**.
9. Click **Create and Display** to put it on your store right away, or **Create Without Display** to save it hidden for now.

Once it's on, customers click a **Size chart** link on the product page, and the chart opens in a panel on the right.

Edit, hide or delete a chart

1. Go to **Store**, then **Manage Store**.
2. In the side menu, click **Catalog**, then **Size Charts**, then **Manage Size Charts**.
3. Next to the chart, click **Action**, then **Edit**. Change the name or the table, or pick another category, then click **Save**.
4. To hide a chart, switch its toggle off. Switch it on to show it again.
5. To remove it for good, click **Action**, then **Delete**.

Move the size chart link

The link to the size chart can sit in a different spot on the product page, such as right under the product name. Here's how to move it.

1. In the side panel, click **Store**, then **Store Pages**.
2. Open the **Product Page**, then click the **Product Page** widget. This opens the design editor.
3. Drag the **Size Chart** element to where you want it.
4. Publish. If you don't see a **Publish** button, tell us and we'll publish it for you.

Tips

- Put the **Size** option at the bottom of your options list, with the chart link below the options, so the link sits next to the sizes.
- Measure the way your customers will. Say where to hold the tape.

Need a hand?

If your site doesn't have this yet, ask us about adding it. We quote it in writing first, and nothing is billed unless you approve. Email hello@zossoz.com.

Already have a store and want us to add a chart? Email your business name, the category and your sizes with measurements, and we'll take care of it. We reply within one business day.
