

Edit your site from a phone or tablet

What to expect when you edit on a phone or tablet, which jobs suit it and when it's quicker to email us.

You can edit your site from a phone or tablet. There used to be a separate phone version of the editor. It's gone. Now a phone or tablet shows the same editor you'd see on a computer, and the guides in this Help Center describe it.

What to expect

- **Same editor, smaller screen.** It has the same menus and labels as on a computer. A phone screen is small for it, so a laptop is easier for anything bigger than a quick fix.
- **On an iPad,** you see the computer layout while you edit. Anything made only for tablet size won't show there.
- **Some guides say "right-click."** If you can't find the matching option on your phone, email us instead of struggling with it.

Jobs that suit a phone

Small, quick ones: a new phone number, a corrected price, one new photo you just took. For these, see [Edit text on a page](#) and [Add a photo from your phone](#).

Steps

1. Open your browser on the phone or tablet and log in to your site editor. See [Log in to your site editor](#).
2. Open the page and find the thing you want to change.
3. Make the change.
4. Check how it looks before you publish. See [Preview your changes before you publish](#).
5. Publish. If you don't see a **Publish** button, tell us and we'll publish it for you.

When emailing us is quicker

For several changes, a new page, many photos or anything you'd rather not do on a small screen, email us. Send the page, the exact words and any photos. See [Request a change](#) and [Send us photos and files](#).

Tips

- To see what customers see, open your live site on your phone. See [Check how your site looks on a phone](#).
- Don't save your login on a phone you share. See [Keep your logins safe](#).
- For your numbers, see [Find your site's numbers on the dashboard](#).

Need a hand?

Email hello@zossoz.com with your business name, the page, and what you'd like done, and we'll take care of it. We reply within one business day. It counts as one of your small changes for the month. See [Request a change](#).
