

Find your site settings

A short map of the Settings area in your site editor: your address, padlock, icons, privacy, backups, languages and more.

The editor keeps most of your site's general options together in one area. Here's a quick map of what's there and which article explains it.

Open it

1. Log in to your site editor.
2. In the side panel, click **More**.
3. Click **Settings**.

Some settings are greyed out until your site is published.

What you'll find

Where	What it's for	Read
Site Domain	Your site's address, a preview link you can share, and the unpublish button	Connect your website address to your site
Site SSL	The padlock and the secure address setting	What the padlock (https) means
Site Icons	The small icon in the browser tab, the picture shown when your site is shared and the home screen icon	Change the small icon in the browser tab
Privacy Settings	Your privacy page and the cookie notice	Add a privacy page to your site
Site Backup	Saved copies of your site	Save a backup before a big change
Site Language	Translates the built-in text that comes with some of your site's tools	Set your site's main language
404 Page	What visitors see when a page can't be found	Change your "page not found" page
Google Analytics	Connects your Google Analytics account	Connect Google Analytics or Search Console
URL Redirect	Sends an old link to a new page	Send an old link to a new page

Careful with these

- **Unpublish** takes your whole site offline until it's published again. Please email us before you click it.
- The preview link in **Site Domain** shows your site with changes that aren't live yet. It's handy for showing someone a draft.

Tips

- Settings that change the live site need a publish afterward. If you don't see a **Publish** button, tell us and we'll publish it for you.
- Not every site has every setting switched on. If something on this list is missing for you, tell us.

DON'T SEE THIS?

It may be turned off for your site. Ask us and we'll take care of it.

Need a hand?

Email hello@zossoz.com with your business name and what you're trying to change, and we'll take care of it. We reply within one business day. See [Request a change](#).
