

Offer local delivery

Deliver to customers near you by listing the ZIP codes you serve, so only people in those areas can choose local delivery.

Add-on [Online store](#)

Online stores are an add-on. If your site doesn't have one yet, ask us about adding it; we quote it in writing first.

If you deliver orders yourself, or with your own driver, you can offer local delivery. You list the ZIP codes you serve, and customers in those areas can choose it at checkout.

Set it up

1. Log in to your site editor.
2. In the side panel, click **Store**, then **Business Settings**.
3. Click **Shipping & Pickup**.
4. Click **+ Add Zone**. If you already have a zone, click **+ Add Shipping Zone**.
5. Type a **Zone name**. Only you see it.
6. Under **Add one or more destinations**, choose the country and region you deliver in.
7. Click **Next**, then choose **Local delivery**.
8. In **Ship to specific ZIP or postal codes**, type the ZIP codes you deliver to, separated by commas.
9. Fill in the other delivery details the screen asks for.
10. Click **Save**.

Using an asterisk

To cover a whole block of ZIP codes at once, type the digits they share and add an asterisk. For example, 331* covers every ZIP code that starts with 331.

Add it to a zone you already have

Open **Shipping & Pickup** and click **+ Add rate** in the zone. Then choose **Local delivery** as the delivery method.

To change or remove it later, open the three-dot menu beside the rate and pick the edit or delete option.

Tips

- Start with the ZIP codes you can reach on time. It's easier to add more later than to disappoint customers.
- If you take cash when you deliver, see [Show payment methods by delivery choice](#).
- Running a restaurant? See [Set up online ordering for a restaurant](#).
- If you'd rather customers collect, see [Offer in-store or curbside pickup](#).
