

Rename or reorder your pages

Change a page's name or move pages up, down or under another page, all from the Pages panel.

The Pages panel is where your site's pages live. From there you can give a page a new name, and drag pages into the order you want them to show.

Rename a page

1. Log in to your site editor.
2. In the side panel, click **Pages**.
3. Click the three-dot icon beside the page's name. On some screens it's a gear icon.
4. Click **Rename** and change the name.
5. Publish. If you don't see a **Publish** button, tell us and we'll publish it for you.

To change the page's web address, see [Change a page's web address and settings](#).

Move a page

1. In the side panel, click **Pages**.
2. Click and drag a page up or down to where you want it.
3. For a sub-page, drag the page a little to the right so it sits under the page above it. A menu can go up to three levels deep.
4. Publish. If you don't see a **Publish** button, tell us and we'll publish it for you.

Tips

- When your menu follows your pages, the order in this panel is the order in your menu. Open the live site afterward and check the menu.
- Short names read best in a menu. "Visit" works better than "How to find our shop and what time we open".
- If your menu was built by hand and doesn't match this panel, change it from the menu itself: Change the links in your menu.
- To put several pages under one heading, see [Group pages under one menu item](#).

Need a hand?

Email hello@zossoz.com with your business name, the pages, and the order or names you'd like, and we'll take care of it. We reply within one business day. See [Request a change](#).
